4 Corner Boat Lifts

GET A RECOMMENDATION

- Attaches to dock frame with multiple galvanized steel brackets
- Can accommodate bow first or stern first docking
- High Density Nylon Low Friction bearings create quiet, strong, and smooth operation
- Offers all-weather protection for your boat
- Reinforces dock strength and stability
- Virtually maintenance free
- Solid steel frames which are hot dipped galvanized to fight weathering
- 3 inch slide tubes for increased strength and durability
- Dual pitman arms for stability and security
- A permanent ring of air around the frame which takes pressure off your dock when the boatlift is in the down position.
- Unique safety features to insure the health of loved ones and your boat.
